

### Mushroom Max Advanced Immune Support

A unique veterinarian-formulated blend of four functional mushrooms recommended for serious immune support: Maitake, Reishi, Shiitake, and Turkey Tail work synergistically with antioxidants to help support and balance the immune system to promote overall health and well-being.

Available in 60ct and 120ct Soft Chews

### Mushrooms are a Superfood!

Mushrooms are a special type of unique living organism. They do not have roots, leaves, flowers or seeds, are classified as fungi, and have been used for centuries as a nutritional food source and as a natural remedy. Every mushroom species has unique health benefits and natural potent functioning agents that have been shown to be extremely beneficial for overall immune support.

### What is the immune system and what does it do?

#### A Healthy Immune System Fights Invaders

- The immune system is the surveillance and defense system of the body. It recognizes foreign substances and eliminates them from the body
- The immune system helps protect the body from invaders such as toxins, viruses, bacteria, and parasites
- The immune system is made up of different organs, cells, and proteins
- The immune system targets cellular change and damaged cells

### Mushroom Benefits:

#### Maitake:

- Contains polysaccharides and beta-glucans that may help support immune cells such as macrophages, natural killer cells and helper T-cells
- Neutralizes damaging free radicals to reduce oxidative damage
- Balances and boosts immune function
- Supports a healthy bladder and urinary tract
- Supports a healthy digestive system
- Helps maintain healthy blood glucose levels

#### Reishi:

- Contains polysaccharides, triterpenoids, and amino acids that may help strengthen the immune system
- May help prevent DNA from oxidative damage
- Supports healthy liver function
- Supports healthy cardiovascular and respiratory system
- Supports healthy aging

#### Shiitake:

- Contains lentinan, a polysaccharide, that helps strengthen the immune system
- Helps neutralize damaged cells and supports the development of healthy cells
- Rich in vitamins, enzymes, and amino acids
- May help protect DNA from oxidative damage
- Helps maintain healthy blood cholesterol levels

#### Turkey Tail:

- Contains polysaccharides and beta-glucans that may help support immune cells such as macrophages, natural killer cells and helper T-cells
- Supports the respiratory system
- Supports the digestive system
- Supports a healthy urinary tract
- Supports healthy liver function
