

BREATHE' -O₂[™]

(LUNG/ENERGY)

2-Way Support:

Lung/Airway science-based actives

High-Level B vitamins - Oxygen/Energy

Key Active Ingredient Function...

Citrulline

A naturally occurring amino acid that helps support normal energy levels. Helps increase ATP (Adenosine triphosphate), the main source of energy for cells and aids in the production of creatine (an energy source in muscle).

Alpha Lipoic Acid

A natural antioxidant that supports normal inflammatory response and helps regenerate water soluble vitamins (C, E). Helps promote normal blood vessel function and the activity of other antioxidants like glutathione and COQ10. Helps promote normal blood pressure activity and over-production of endothelin 1, the main vasoconstrictor.

I-Tyrosine

An amino acid found in the diet that is involved in producing catecholamines such as dopamine and adrenaline, specifically it is the amino acid that itself is metabolized to produce these neurotransmitters.

DMG

A powerful antioxidant that helps maintain normal energy levels, oxygen utilization and glucose metabolism.

Menthol

Known to be a natural vasodilator and support normal bronchial function. Helps support smooth muscle in airway and nasal passages.

B Vitamins

Help support overall healthy respiratory/cardiovascular system, red blood cell production, proper nerve function, cellular health, energy levels and brain function.

BREATHE'-O₂[™] contains science-based actives to support lung/air-way function, along with a proprietary blend of several key B Vitamins for energy providing for greater oxygen carrying capacity!

Administer 40ml 30-60 minutes pre-race/exercise. Can also be administered 30 minutes post-race to aid in normal muscle recovery.

ACTIVE INGREDIENTS per 40ml dose:

Citrulline	4,000 mg
Alpha Lipoic Acid	3,000 mg
I-Tyrosine	3,000 mg
Dimethylglycine (DMG)	1,000 mg
Menthol	1,000 mg
Proprietary Blend	1,256 mg
<i>(d-Pantothenic Acid, Niacin, Thiamine, Riboflavin, Pyridoxine, Cyanocobalamin and Folic Acid)</i>	

BREATHE' -O₂[™] (Paste)

78501270 80 ml (2 dose)\$18.50
